

CELL PHONES

The calling of the cell we respond to rapidly yet the calling of the Azaan we tend to disregard.

Communicating with the rest of the world we thrive on
But with the Almighty we have none.

Ears we use to listen to musical tones forgetting
The Qiraat we read in Salaat.

Love of the world fills our heart but
Love for Allah is far from the soul.

Lazy we are to switch of our cellphones, longing to talk to all
except Allah the creator of your phone

Promises we make to switch off the phones
but pondering on the blessings of Allah we seldom do

Hungry we are for news of the world.
Heaven and hell are far from the thought.

Oneness of Allah we tend to forget openly sinning without regret.

Noise is all we always never regret
Ne'maats of Allah we always forget.

Every effort we make to learn about the phone but the ever-lasting,
all-hearing, all-seeing Allah we make no time to learn about

Sunnats of the beloved Nabi (SAW) we disregard or fail to learn about but
*every Feature of the phone we must know. So few of the sunnats we put
into practice Yet every feature of our beloved phone we put into practice.*

O mumeen stop, ponder, listen and understand the battery will soon have to be recharged but what about to recharge and upgrade our IMAAN.
